Profile

Passionate about information systems technology with a specialization in software architecture and backend development. Experienced in project management, database management (relational and non-relational), API development, and programming. Creative and organized, I am eager to contribute to Big Web Data solutions in an international environment.

Professional Experience

- **Developer (Intern)**

Company: Phil Jonh Tech, Yaoundé (2023 - 2024)

Developed web scraping scripts for E-commerce data extraction, resolved bugs, and provided client support. Implemented testing to ensure the quality of Python scripts.

- **Developer (Intern)**

Company: TECH SARL (2022 - 2024)

Participated in database projects, network and telecommunications setup, and system configuration using Cisco Packet Tracer.

Projects & Achievements

- Participated in the CARMARS International Robotics Competition in South Africa, where our team won the award for Best in Africa.
- Placed second in the Tekbot Robotics Competition in Benin, receiving the "Best Work" award.
- Developed a recycling robot (collective project)

- Lead of the robotics club at ESGIS
 - Developed a student management platform in PHP
 - Built a Room application in Python/Django
 - Set up a database for student and library management
-

Education

Bachelor's Degree in Computer Science (in progress) - ESGIS

Certifications: Python, PHP, Arduino, Data Analytics with Python - freeCodeCamp

Skills

- **Backend Development:** Python (Django, Flask), Node.js
 - **Database Management:** Relational (MySQL, PostgreSQL, SQL) and Non-relational (MongoDB) databases, phpMyAdmin
 - **Programming Languages:** Python, JavaScript, HTML, CSS, PHP
 - **API Development:** RESTful API design and implementation
 - **Web Scraping:** Data extraction and HTML structure knowledge
 - **Development Tools:** GitHub, Linux, networking, and telecommunications
 - **Soft Skills:** Team player, detail-oriented, organized
-

Languages

- French: Fluent
 - English: Basic
-

Interests

- Music, sports, cooking
 - Graphic design
 - Cloud and network systems
 - Digital marketing and mobile development
-

What I Offer

A proactive and dedicated approach to Big Web Data solutions within an international team setting. Available to work remotely, Sunday to Thursday, and committed to achieving shared goals.
